

SSCP - Systems Security Certified Practitioner

Course Description

SecureNinja's SSCP training and certification boot camp in Washington, DC and San Diego, CA is considered the global standard that proves an individual's proficiency in several security disciplines. The focus of the SSCP certification is more on skills and issues relevant to a day-to-day network and systems administrator, than the more managerial side of a CISSP. If you are looking to have a certification that will show your credibility to the Information Security world sooner, then the SSCP certification is for you.

Topics Covered

- Access Controls
- Analysis and Monitoring
- Cryptography
- Malicious Code
- Networks and Telecommunications
- Risk, Response, and Recovery
- Security Operations and Administration
