

CASP (CompTIA Advanced Security Practitioner)

Overview

Newsflash: SecureNinja's CASP is now updated with the CompTIA CASP - CAS-003 exam objectives!

SecureNinja's CompTIA Advanced Security Practitioner (CASP) training and certification boot camp in Washington, DC and San Diego, CA is like no other CASP accelerated immersion class available in the market today.

SecureNinja's Secure Ninja Team are widely known as the world's leading instructors for CompTIA exam preparation from whom you will not only will receive the knowledge to pass the exam but come back to the job with real world skills you can apply right away maximizing your training investment. You will benefit from their extensive knowledge base as they teach you proprietary tips and tricks for exam passing success.

The CompTIA Advanced Security Practitioner (CASP) Certification is a vendor-neutral credential. The CASP exam is an internationally targeted validation of advanced-level security skills and knowledge. While there is no required prerequisite, the CASP certification is intended to follow CompTIA Security+ or equivalent experience and has a technical, "hands-on" focus at the enterprise level.

The CASP exam will certify that the successful candidate has the technical knowledge and skills required to conceptualize, engineer, integrate and implement secure solutions across complex environments. The candidate will apply critical thinking and judgment across a broad spectrum of security disciplines to propose and implement sustainable security solutions that map to organizational strategies, translate business needs into security requirements, analyzes risk impact and respond to security incidents.

The CompTIA Advanced Security Practitioner Certification Exam is accredited by ANSI to show compliance with the ISO 17024 Standard and, as such, undergoes regular reviews and updates to the exam objectives.

Topics Covered

- Enterprise Security
- Risk Management and Incident Response
- Research and Analysis and Assessment
- Integration of Computing, Communications and Business Disciplines
- Technical Integration of Enterprise Components

Successful candidates will:

- Demonstrate competency in enterprise security, risk management, research and analysis and integration of computing, communications, and business disciplines.
- Demonstrate proven knowledge of security concepts, tools, and procedures to proactively guard against security threats at the enterprise level.

- Apply critical thinking and judgment across a broad spectrum of security disciplines to propose and implement solutions that map to enterprise drivers.
