Topics Covered

- Initiating the project
- Planning the project
- Executing the project
- Monitoring and controlling the project
- Closing the project
- Professional and social responsibility

Who Would Benefit

The PMP Certification Exam Training Program is constructed to help project managers master the material needed to obtain PMI's PMP certification. It was designed with the recognition that because of the specific requirements of your organization, practicing project managers (PMs) often have great expertise in some areas but would greatly benefit from the review of the entire project management field.

The PMP recognizes demonstrated competence in leading and directing project teams. If you're an experienced project manager looking to solidify your skills, stand out to employers and maximize your earning potential, the PMP credential is the right choice for you.

Prerequisites

A four-year degree (bachelor's or the global equivalent) and at least three years of project management experience, with 4,500 hours leading and directing projects and 35 hours of project management education.

OR

A secondary diploma (high school or the global equivalent) with at least five years of project management experience, with 7,500 hours leading and directing projects and 35 hours of project management education.

Required Exams

PMP FAQ's

What is the PMP certification?

The Project Management Institute (PMI) grants a Project Management Professional (PMP) certification that is well-known in the field. This certification recognizes experience, education, and accomplishment in project management. To become certified, candidates must pass an exam.

What is the CAPM Certification?

PMI grants a Certified Associate in Project Management (CAPM) certification that is

beneficial to project team members or early-stage project managers who are looking for a stepping stone to the PMP certification. For information on eligibility requirements for either the PMP or CAPM certification exams, please refer to the PMI website: www.pmi.org

Can I earn PDU credits by attending a SecureNinja Training PMP boot camp?

Yes. Those interested in taking the PMP exam must earn a minimum of 32 professional development units (PDUs) through a PMI Registered Education Provider. Once certified, PMPs must earn at least 60 PDUs every three years to maintain their certification

The Method:

The Training Program is divided logically into two parts. The first part reinforces the PM's understanding of project management, while at the same time introducing PMI's precise terminology and project management philosophy. The second part drills into you the specific topical knowledge needed to pass the PMP examination.

Using Your Experience:

The first part leads you through the Project Management Life Cycle using the context of the PMI Process Groups. It teaches project management the way it's practiced, from start to finish. This methodology builds on your existing knowledge base to enable you to adopt the precise language and standardized terminology of PMI and build real-world project management skills.

Preparing for the Exam:

The second part of the course examines the specific skills of project management through the lens of the Nine Knowledge Areas. Special importance is given to those concepts which historically have been emphasized by PMI, including memorization of guides and diagrams. Intense question review and focused memorization are an integral part of this section.

Putting it all Together:

The PMP Certification Exam Training Program is an intensive 32-hour program. Frequent practice exams, reviews, and written exercises will enable you to master the test-taking skills needed for the PMP examination.

Passing the PMP Exam

The historical pass rate of students who have taken this class is 97%. We offer you the following guarantee*: If you do not pass, you may re-sit a PMP Certification Exam Training Program session within one year.
