

CISO Support

Modern businesses can no longer ignore the need for information security. Some organizations do not require a full time CISO or security manager but need an on-demand resource for security guidance and support. Secure Ninja Security has helped small to medium business tackle security challenges from the data center to the boardroom. Our consultants can assist you in everything from staff augmentation, secure software development, and security program development.

For more information call **703.535.8600** or complete the form at the left with your contact information and needs and a Secure Ninja Security Solution Specialist will respond to your request shortly.
