Wardialing

In many organizations, modems remain an unchecked vulnerability. All of the VPNs, firewalls and other network security controls won't stop someone from accessing the network via an insecure modem. Secure Ninja Security's Wardialing service scans all of the organization's telephone dial-in numbers looking for modems, fax machines, PBX's, etc. This allows the customer to understand their risk from out of band connections.

For more information call **703.535.8600** or complete the form at the left with your contact information and needs and a Secure Ninja Security Solution Specialist will respond to your request shortly.
